## **a.i. solutions Wins National and International Awards for Emergency Management iPad Application**

LANHAM, MD, Aug. 3, 2011 – The International Association of Emergency Managers (IAEM) has given a.i. solutions both the national and the international first place Technology & Innovation Awards for the company's iMPrepared™ iPad application.

The award recognizes the development of technology and innovation that improves emergency preparedness and public education.

a.i. solutions released iMPrepared in October 2010 to help users create a secure, central and mobile individual or family preparedness plan that includes contact numbers as well as medical, pet, and insurance policy information. iMPrepared guides users in creating emergency supply kits and also includes a compass, flashlight, disaster RSS feeds, and an S.O.S. signal. It is available for free download at the Apple's iTunes App Store.

a.i. solutions, who provides emergency preparedness planning to NASA, originally conceived of the application as a consolidated mobile tool to help NASA employees create family preparedness plans before a disaster strikes, so that in the event of a disaster, essential functions of the U.S. government may continue and be restored as rapidly as possible.

"These awards recognize that iMPrepared can play a crucial role in helping individuals and families prepare and cope with disasters," said Bob Sperling, President and CEO of a.i. solutions. "Having all of our citizens prepared can enable communities to recover from disasters more quickly."

For more information or to download the iMPrepared application, please visit <http://itunes.apple.com/us/app/imprepared/id396912356?mt=8>.

### **About a.i. solutions**

Founded in 1996, a.i. solutions is a small-business provider of innovative mission-critical products and services that enable uninterrupted and reliable access to space. a.i. solutions' products and services span flight dynamics, space operations, satellite ground systems, information assurance, missile systems, and launch vehicle engineering in support of the nation's space and defense agencies.
