a.i. solutions Selected for Small Business Industry Award by NASA's Goddard Space Flight Center

Lanham, MD, August 18, 2010 –a.i. solutions has been named Small Business Prime Contractor of the Year by NASA's Goddard Space Flight Center as part of the agency's annual Small Business Industry Award (SBIA) program.

The award is one of three given annually in contractor categories by each of NASA's individual flight centers and research labs. The other two categories are for small business sub-contractor and large business prime contractor. The award makes a.i. solutions a candidate for NASA's agency-level SBIA, to be announced at an awards ceremony in Washington, DC, on Dec. 1.

"This award is a testament to the hard work and dedication of the a.i. solutions team we have supporting NASA at Goddard," said Robert Sperling, a.i. solutions President and CEO. "We hope to continue to make significant contributions to our country's space efforts for many years to come."

The awards are managed by NASA's Office of Small Business Programs to encourage the highest level of professionalism among the many companies providing services to the agency. The awards recognize high performance on NASA contracts, responsiveness to customer requirements, and innovative practices that promote small business participation in the initiatives that NASA undertakes.

About a.i. solutions

Founded in 1996, a.i. solutions is a small-business provider of innovative mission-critical products and services that enable uninterrupted and reliable access to space. a.i. solutions' products and services span flight dynamics, space operations, satellite ground systems, information assurance, missile systems, and launch vehicle engineering in support of the nation's space and defense agencies.
