## **a.i. solutions Named Small Business Prime Contractor of the Year by NASA**

Lanham, MD, December 7, 2010 –a.i. solutions has been named Small Business Prime Contractor of the Year by the National Aeronautics and Space Administration (NASA) in the agency's annual Small Business Industry Award (SBIA) program.

The award recognizes the high quality of company's ongoing work at Goddard Space Flight Center, Kennedy Space Center, and NASA Headquarters, where a.i. solutions engineers and technicians provide support to agency activities. It is one of three given annually in contractor categories among companies who are nominated by each of NASA's individual flight centers and research labs. a.i. solutions had previously been named Small Business Prime Contractor of the Year by the Goddard Space Flight Center, and was also nominated for KSC's sub-contractor award. The other two award categories are small business sub-contractor and large business prime contractor.

"We are deeply honored that NASA has recognized the ongoing dedication and commitment of our team members," said Robert Sperling, a.i. solutions President and CEO. "We feel privileged to be engaged in furthering the nation's spaceflight activities and to represent the Small Business program at NASA."

The SBIA program is managed by NASA's Office of Small Business Programs to encourage a high degree of professionalism among the many companies providing services to the agency. The awards recognize quality performance on NASA contracts, responsiveness to customer requirements, and innovative practices that promote small business participation in the initiatives that NASA undertakes.

### **About a.i. solutions**

Founded in 1996, a.i. solutions is a small-business provider of innovative mission-critical products and services that enable uninterrupted and reliable access to space. a.i. solutions' products and services span flight dynamics, space operations, satellite ground systems, information assurance, missile systems, and launch vehicle engineering in support of the nation's space and defense agencies.
