a.i. solutions Announces its 10 Year Anniversary

Lanham, Maryland, December 22, 2006 -- a.i. solutions announced today that it will celebrate its 10 year anniversary. In the past decade, a.i. solutions has grown from a small start-up contractor based at Goddard Space Flight Center to an over 150 person company with two corporate offices and eight locations nationwide.

In its ten year tenure in the space industry, a.i. solutions has supported over 200 expendable launch vehicle and space missions including the space shuttle, the GPS program and the Earth Observing System (EOS) satellites. “We started a.i. solutions because we had a passion for space,” stated a.i. solutions founder and CEO, Robert Sperling. “We’ve been successful because we bring that passion to everything we do, from space exploration to the protection of our national interests.”

a.i. solutions also develops and markets the commercial space mission analysis software, *FreeFlyer*®, which is used by both NASA and the US military for space mission analysis and operations.

About a.i. solutions

Founded in 1996, a.i. solutions is a small aerospace engineering firm that provides mission-critical products and services to the US government. a.i. solutions has supported over 200 space missions and are the developers of the commercial space mission analysis software, *FreeFlyer*®.
